NISSAN SAFETY SHIELD® FEEL EMPOWERED

DISCOVER A DRIVE THAT'S ALIVE WITH TECHNOLOGIES, using cameras and sensors the All New Nissan Qashqai delivers 8 different safety systems which work together to build your confidence and keep you on top of your surroundings at all times.

AUTO HI LO BEAM

When driving on a country road, for example, this system maximises your visibility by activating your high beams and temporarily dipping the lights when it recognises oncoming or distant traffic. With the full LED headlamps, All New Nissan Qashqai offers a wider and more illuminating driving experience.

TRAFFIC SIGN RECOGNITION

The system keeps you up to date with all the latest speed limits by detecting the road signs as you go.

LANE DEPARTURE WARNING

Watch out, you'll be warned if you drift out of lane. Unless you're indicating, the system will remind you to straighten up. While it can detect the faintest road markings, it'll adjust its sensitivity on rural roads to allow for the different driving style required.

FRONT COLLISION AVOIDANCE

If there's a risk of a collision with the vehicle in front, the system gives an audible and visible warning signal. If the driver does not react, automatic hard braking is activated to slow the vehicle.

MOVING OBJECT DETECTION

Meet your digital parking co-pilot. This function lets you know if anything is approaching, with its 360 degree coverage – not just objects but children and animals too.

BLIND SPOT WARNING

What you can't see, All New Nissan Qashqai can. If there's a vehicle in your blind spot area on either side of your car, a warning light will illuminate on the interior door panel. If you're indicating to change lanes and a vehicle is dangerously close, the light will flash and you'll hear a warning sound too.

DRIVER ATTENTION SUPPORT

No risk of nodding off or losing focus: the system judges your concentration levels and fatigue state according to your input and warns you if you need a break with an audible and visible signal.

PROTECT

6 STANDARD AIRBAGS

BAY PARKING. In multi-storey car parks and busy supermarket bays, the Around View Monitor helps you find the best spot and fit. The Intelligent Park Assist system will even reverse park your All New Nissan Qashqai for you.

AROUND VIEW MONITOR

COVER THOSE BLIND SPOTS. In reverse, see what's directly behind you and use the overhead view to check for short objects that may otherwise be hidden below your line of vision.

CHASSIS CONTROL functions are displayed on your TFT display screen: Active Trace Control, Active Engine Brake and Active Ride Control work together to keep you in the driving seat.

ACTIVE TRACE CONTROL delivers confident handling when cornering by controlling brake pressure on each wheel to help trace the line of each bend and deliver smooth vehicle responses.

ACTIVE ENGINE BRAKE (CVT models only) enables smoother cornering and straight-line deceleration for a direct and engaging driving experience.

ACTIVE RIDE CONTROL applies subtle braking to restrain uncomfortable upper body motion and enhance ride comfort.

ALL MODE 4x4-i: off-road or on-road, 4x4-i maximises tyre traction by measuring wheel slip and instantly distributing torque automatically, with up to 50% going to the rear wheels. This intelligent system will also move the torque left and right to maximise traction.
